

## Quick Saver™ Program

### Saving your small business money

*One-stop savings with an assessment, instant incentives and professional installation.*

With the Quick Saver Program, PNM makes it quick and easy for small business owners to save energy and reduce electric bills by making lighting and refrigeration retrofit upgrades.

Designed with the small business in mind.

- A free assessment of your energy efficiency options
- A price quote and instant incentives
- Full installation services

## Multifamily Program

### Multiple ways to save with multifamily

*Make your multifamily community more efficient, and more profitable.*

PNM has ways to save for multifamily property owners and managers. We provide incentives for new construction and existing communities, we also provide bonus incentives for income-qualified communities.

Incentives for equipment in-unit and in common areas.

- Interior and exterior lighting
- Refrigerated air, pool pumps, and more

# Business Energy Efficiency Programs

Get rebates from PNM for installing energy-efficient equipment

Permanently lower your energy-related operating costs

Contact an energy efficiency expert to find potential savings in your business today

## New Construction Program

### Efficient by design

*A ground-up, comprehensive approach to high-performance buildings.*

Incentives are available for implementing more efficient designs and for exceeding standard energy code requirements on building equipment and systems during new construction.

## Retrofit Rebate Program

### Improve an existing facility

*Retrofit incentives can help offset the cost of improving your existing facility.*

Incentives are available to you for installing energy-efficient equipment in your building.

Qualifying equipment categories include:

- Lighting and controls
- Heating Ventilation and Air Conditioning (HVAC)
- Refrigeration and food service equipment
- Motors and controls
- Window film
- Custom measures

## Distributor Discount Program

### Instant equipment discounts

*Get immediate, point-of-sale discounts from participating distributors*

Purchase eligible equipment from participating distributors to receive a “rebate” as a discount, instantly, at the time of purchase - no paperwork required.

### HVAC equipment

This program includes discounts on high-efficiency Heating, Ventilation and Air Conditioning (HVAC) equipment.

Qualifying HVAC equipment types include:

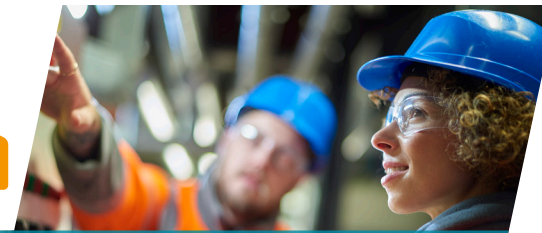

- Packaged Terminal Air Conditioners (PTAC)
- Packaged Terminal Heat Pumps (PTHP)
- Packaged AC Units and Split-System AC Units
- Variable Refrigerant Flow Heat Pump Units
- Packaged Heat Pumps and Split-System Heat Pumps

### Food service equipment

The Distributor Discount Program includes incentives for qualifying energy-efficient commercial food service equipment.

Qualifying food service equipment includes:

- High-efficiency commercial ovens, fryers, griddles and steam cookers
- Walk-in and reach-in freezers
- Hot-holding cabinets
- Ice machines

## Building Performance

### Optimize your building performance

*Offset the cost of improving the efficiency of your existing equipment and operation.*

### Retro-commissioning

The Retro-Commissioning Program offsets the cost of a detailed study to identify opportunities to optimize the operational potential in your building. Incentives are also paid to you for implementing the recommended findings and achieving energy savings.

### Building Operator Certification

Tuition reimbursement is available for qualified building operators and facility managers who complete a national training program that improves skills and knowledge for energy-efficient building maintenance.
