

A FREE energy assessment could save your business thousands of dollars

The PNM Quick Saver™ Program is as simple as 1 - 2 - 3

Powering New Mexico, Together

1

Call 505-938-9400 for a free energy assessment

We'll guide you to our Authorized PNM Quick Saver™ Contractor directory. You select a contractor and schedule an appointment. They will perform a lighting and/or refrigeration evaluation and assess the energy savings potential of your business.

2

Review the assessment and written proposal

The proposal includes recommendations, estimated energy savings, costs covered by PNM rebates, and investment payback time for the upgrades that are most effective for your business.

3

Approve the recommended energy efficiency upgrades

The contractor handles all the paperwork, obtains necessary equipment and performs the installation.

How Quick Saver™ Works

- With an approved proposal, your authorized contractor files the necessary paperwork with PNM and performs the installation.
- PNM pays a portion of the project costs directly to the authorized contractor.
- You pay the balance. Customers are typically able to recover project costs through utility savings in 1 to 2 years.

Who Qualifies

All PNM Small Power customers whose total average monthly peak demand is 200 kilowatts or less qualify for PNM Quick Saver™. Look on your PNM bill to determine if you are a Small Power customer or ask about your usage when you call to participate.

To Participate

Call us toll-free at 505-938-9400, or visit [PNMenergyefficiency.com](https://www.pnmenergyefficiency.com).
