

PNM Business Energy Efficiency Programs

Roadmap to Rebates

Your Guide to Saving Energy and Money

I have an *existing facility* that needs upgrades.

Installing energy-efficient equipment in existing facilities.

I have a *new construction* plan.

Implementing more efficient designs and exceeding code requirements.

I have a *small business* that needs upgrades.

On the Small Power rate or maximum monthly peak demand of 200 kW per meter.

I have a *multifamily community* that needs upgrades.

Designed specifically for multifamily property efficiency.

The Retrofit Rebate Program can help offset the cost of installing more efficient equipment at your existing facility.

Prescriptive (pre-set) and custom rebates are available for installing qualifying equipment in existing buildings.

The New Construction Program supports high-performance buildings when exceeding building code and conducting enhanced building commissioning.

Prescriptive rebates are available for installing qualifying equipment in new buildings.

Whole building performance rebates are available for electricity savings beyond ASHRAE 90.1-2016.

The Quick Saver™ Program offers one-stop savings with an assessment, instant incentives, and professional installation.

Small businesses work with authorized contractors to apply for incentives when installing more efficient lighting and refrigeration equipment at their facility.

The Multifamily Program offers incentives for installing qualifying equipment in common areas and individual dwelling spaces within multifamily properties.

Additional incentives are available for income-qualified properties.

— **The Building Tune-up Program** offsets the cost of optimizing building performance and improving system efficiency of small, medium, and large commercial buildings using a whole-building approach.

The Retro-Commissioning Program offers funding for identifying and implementing relatively low-cost operational and maintenance improvements.

The Building Operator Certification tuition reimbursement is for qualified building operators and facility managers who complete the nationally-recognized training.

Step 1: Identify Opportunities

Step 2: Work with a Program Authorized Contractor

Step 3: Install Equipment

Step 4: Complete Application

Step 5: Receive your rebate!
